

# NATH GROUP

a **passion** beyond business

- Accelerating Agricultural growth to feed the teeming millions, deploying Agro-research and biotechnology to produce high yielding hybrid seeds and Seedlings.

- Creating wealth from waste, recycling waste to produce valued added Papers and boards.

- Producing high quality chemicals to catalyse industrial growth.

- Building Food Parks, Industrial Parks and Solar Parks

- Spearheading India's onward march towards agro-industrial revolution.

Merging nature with mankind

A passion beyond business

**NATH**  
**GROUP**

## *Nath pulp & paper mills ltd.*

Nath Pulp & Paper Mills Ltd is a large producer of eco-friendly value added papers and boards with a capacity of 80,000 tonnes per annum.

The company has fully integrated pulp and paper manufacturing facilities at Aurangabad in Maharashtra and Vapi in Gujarat, producing a wide range of high quality products mainly high strength core boards, base paper for laminates, tissue paper and thermal paper.

The company generates its own power from waste heat recovery. The water used in the manufacturing process is treated and reused for captive irrigation to produce flowers, fruits and vegetables.

The company has been the recipient of a series of National Productivity Awards for excellence in performance, capacity utilization and energy conservation.

## **Nath Bio-Genes (I) Ltd.**

Nath Bio-genes is an intensely research driven pioneering seed company committed to provide the Indian farmer with best of seeds for planting. Nath Bio-genes has developed a wide range of seeds for crops of national importance mainly cotton, rice, wheat, corn, pearl millet, jowar, mustard, sunflower and also a wide range of vegetables comprising tomato, okra, brinjal, gourds, hot pepper, cucumber, watermelon, etc.

Nath Bio-genes has direct linkages with over 10,000 farmers for producing quality seeds on about 35000 acres of land making available quality seeds for over 3.50 million acres. The company has wide network of fully equipped research stations, processing plants, warehouses and marketing offices all over the country.

Nath Seeds is a trusted name and enjoys great goodwill and loyalty of the farming community.

Global Transgenes Ltd is committed to the goal of bringing the state of art and safe biotech products to the service of our vast farming community at affordable prices.

GTL is engaged in basic research and applications aimed towards development of novel genes and genetic lines using tools and techniques of modern biology, in particular molecular biology. The major focus is to develop genes encoding novel traits for insect resistance, drought resistance, nitrogen use efficiency and nutrition enhancement.

Global Transgenes has developed a range of novel cotton hybrids encoding the Chinese synthetic Bt-gene (Cry1Ab-1Ac) approved for commercialization in India. Nine seed companies in India have joined hands with Global Transgenes as sub-licensees of our Bt cotton technology.

## **NATH INDUSTRIAL CHEMICALS LTD**

Nath Industrial Chemicals specializes in manufacturing of sulphur based industrial chemicals. The state of the art modern plant has a capacity of 1,20,000 tonnes per annum for manufacture of sulphuric acid, oleums, sulphur trioxide, chlorosulphonic acid, sulphur dioxide and LABSA. These chemicals are widely used in textile and dye industry and also for manufacturing soaps and detergents.

## NATH NIRMAN LTD

The company is engaged in large scale development of infrastructure for a mega food park, an industrial park and a solar park for over 300 acres of land in the vicinity of fast growing city of Aurangabad and a futuristic resort at Karjat near Mumbai in Maharashtra.

## NATH GROUP A PASSION TO EXCEL

From biotechnology to hybrid seeds and food park  
From value added paper to industrial chemicals  
Nath Group's activities are diverse and challenging.

Both Nath's concerns and commitments go much beyond business.  
Adoption of villages, rural development, health care, education and culture.

As a true corporate citizen, everything we do, must contribute to  
economic, ecological and human equilibrium.

Merging nature with mankind  
A passion beyond business
